China's Advanced Manifest Regulation Update

Effective tomorrow, June 1st, 2018 Chinese Customs will implement a new regulation that will affect every shipment destined for China.

Going forward, all shipments must include an Enterprise Registration Code for Shipper, Consignee, and Notify Party

Example of Enterprise Registration Numbers

For Shipper in USA: Employment Identification Number (EIN) or Central Index Key (CIK.)

For Consignee in China: 18 digit Unified Social Credit Identifier (USCI) or Organization Code (OC.)

Enterprise codes differ by country, other examples are Company Number or VAT Number.

Note, the telephone number for shipper, consignee and notify party may also be necessary.

Closing

PCI is committed to helping your business stay in compliance and avoid issues in China.

If you have questions regarding your shipments, we are always available at pci@pci.world

To read more about these regulations, visit the General Administration of Customs China (GACC) website below. (Chinese only)
